Russia

Russia, the world’s largest nation, borders European and Asian countries as well as the Pacific and Arctic oceans. Its landscape ranges from tundra and forests to subtropical beaches. It’s famous for Moscow’s Bolshoi and St. Petersburg’s Mariinsky ballet companies. St. Petersburg, founded by Russian leader Peter the Great, has the baroque Winter Palace, now housing part of the State Hermitage Museum’s art collection.

Medical Academy Named After S.I. Georgievsky Welcomes International Students!

On the basis of Government edict of Russian Federation No 1465-p of 04.08.2014 the university is affiliated to the federal state autonomous educational institution of higher education “Crimean Federal University named after V.I. Vernadsky” as a structural subdivision “Medical Academy named after S.I. Georgievsky”.

- Four departments in training for doctors-specialists and pharmacists - 1st medical, 2nd medical, dental, international medical;

- Department of training medical employees of the highest qualification and additional professional education (APE) – educational programs for interns, residents, masters, refresher training and professional retraining.

The Medical Academy is located in the Crimean peninsula. With its mild and sunny climate, varied and picturesque landscape, and ancient history the Crimea is a truly unique and wonderful place of the world.

37 out of 53 departments of the Academy study clinical medicine. Specialists are trained by specialty programs: 05.31.01 "Medical business"; 31.05.02 "Pediatrics"; 31.05.03 "Dentistry"; 33.05.01 "Pharmacy". Masters are trained by specialty 38.04.04 "State and municipal management":

1. Master's program "State management in the field of health protection".

2. The Master's program "Management of modern health organization (institution)".

Currently students from 45 countries are studying at our Academy. We aim to offer our students an excellent education experience working closely with our university partners to ensure the quality of our education is of a very high standard.

S. I. Georgievsky’s Medical Academy is a structural subdivision of the federal state autonomous educational institution of higher education "V.I. Vernadsky’s Crimean Federal University" established by the Federal Government Order (number 1465-r of 04.08.2014).

Educational activities are carried out on the grounds of the license № 1260 from 6 February 2015 that was issued for Federal state autonomous educational institution of higher education "V.I. Vernadsky’s Crimean Federal University" by Federal service on supervision in the education and science sphere.

University has created a continuing medical education model including:

- Pre-university training - preparatory department, preparatory courses;

Academy’s traineeship consists of 32 licensed professions.

The university developed a comprehensive approach to organizational, scientific and methodological support of the educational process. Education level in Academy meets all requirements of modern medical institution by introducing educational films, molds, phantoms, diagnostic equipment in clinical departments and training center.

The high level of our students’ education is provided by a strong teaching staff: about 700 experts including 383 PhD and 97 Doctors of Sciences (academic title: Associate Professor - 208, Professor - 77). Currently 4560 students are trained in Medical Academy (1 747 - foreign citizens from 45 countries), 126 interns, 368 residents, 51 postgraduate, 89 masters (second higher education in state and municipal health management).
History of the Medical Academy goes back to the beginning of the 21st century: in 1918 it was medical faculty of Taurida University.

In 1931 it separated and became an autonomous unit - Crimea Medical Institute. Since 1995 the higher school has been named in honor of Sergey Ivanovich Georgievsky (rector of the institute in 1951-1970).

In 1998 the higher school became a university with the 4th (highest) accreditation level. Throughout these years the medical school has been a center for academic and vocational medical education and medical science in the Crimea at the same time offering specialized consultation in the directions General Medicine and Pharmacy. Today it is an up-to-date educational institution upgrading itself to keep abreast of global trends in medical education and research, developing its intellectual potential and providing top specialists for medical services. The Academy has always been striving for excellence in teaching and research.

To enhance the quality of education the consecutive model of medical education has been created at the Academy: the preparatory department, preparatory courses and medical lyceum; 5 faculties to train doctors and a faculty of post-diploma education.

Junior specialists and bachelors are trained in the specialities: Nursing, Prosthetic Dentistry, Pharmacy; doctors, in the specialities: General Medicine, Pediatrics, Clinical Pharmacy and Dentistry.

Internship is available in 22 specialities. Post-diploma education includes residency, Master’s program and postgraduate study or Ph.D program. Refresher courses in 48 specialities are available at the faculty of post-diploma education.

The Academy has elaborated a holistic approach as to the organizational, scientific and methodological aspects of the educational process. The clinical departments are provided with all the necessary equipment and demonstration aids: educational films, moulages, phantoms, diagnostic inventory - everything has been done for the educational process to meet the modern requirements. The Academy is particularly proud of its highly qualified academic staff, which totals 799 persons: 106 Doctors of Science, Professors, and 524 Candidates of Science (Ph.D. holders), Associate Professors. 40 Academy professors are academicians and corresponding members of domestic and foreign Academies of Sciences; 14 are State Prize laureates, 60 have honorary titles.

About 4.7 thousand students study at Medical Academy named after S.I. Georgievsky, including 1.4 thousand foreign citizens from 40 countries of the world.

Since 1999 English has been the second language of instruction, which makes Medical Academy attractive for foreign citizens coming here to study. For the constant development of cooperation with foreign countries and high quality of education the University was awarded the title of laureate in the rating of Ukrainian higher schools “Sofia Kievskaya – 2004”.

For over 90 years the Academy has been training professional specialists. Academic excellence has been highly appreciated by the International Education Society, which has conferred the Academy AA rank denoting TOP INSTITUTION THAT IS INTERNATIONALLY KNOWN AND RECOGNIZED.

Encouraging enthusiasm for knowledge, intellectual challenge, continuous learning, and scholarly endeavours, inspiring accomplishment within one’s field of study are the essential part of the Academy commitments.
The International Faculty

In the Crimean state Medical Academy training of doctors for foreign countries started in 1961, when 6 students from Greece arrived in Simferopol. In 1966 the dean’s office for the work with foreign students was established, which was later on reorganized into the International medical faculty. Foreign doctors have graduated regularly from our Academy since 1967. The number of the countries, which citizens receive education at our Academy, as well as the quantity of foreign students, are constantly growing. At present students from 38 countries of the world are trained at the Academy.

Since 1999 the Academy has introduced and developed a new method of training – teaching foreign students in the English language. This is the evidence of perspectives of training specialists for foreign countries; it creates all the conditions for transformation of our Academy into a leading center training not only doctors but also lecturers and research workers for higher medical schools abroad.

Encouraging enthusiasm for knowledge, intellectual challenge, continuous learning, and scholarly endeavours, inspiring accomplishment within one’s field of study are the essential part of the Academy commitments.
Information
For Foreign Students About Rules Of Staying On The Territory Of And Leaving Russian Federation

According to the current migration law, when entering the RF you must get and fill in a migration card. You must fill in a migration card yourself in Russian, clearly and without any corrections. If you do not speak Russian, you are allowed to fill in your personal data using the Latin alphabet in accordance with what is written in your passport. You should indicate “studies” as the aim of your entrance to the country!

On arrival in RF (after every crossing the RF border) you must get registered within 3 working days since the days of crossing the border. To do it, you must apply to Room 11 of the Dean’s Office of the International Medical Faculty and produce the passport and the migration card with a mark about entrance to RF made by a border control.

After that you should receive a registration card in the same office within 5-7 days; it will include the allowed term of your staying at RF.

You must 1) always have your registration card with you; 2) show it to law enforcement officers together with your national passport and migration card when the regimen of your staying in RF is checked.

If you change a place where you live, your surname or name(s), a date of birth or receive a new national passport, etc. you must inform the administration of the Academy (Room 11 of the Dean’s Office) within no longer than three days.

To extend the visa you must apply to Room 11 of the Dean’s Office not less than 1.5-2 months before its expiration date! To extend the registration (for foreigners from visa-free countries), you must apply to Room 11 of the Dean’s Office two weeks before its expiration date! If a student fails to do it in time, they will be expelled!

If you lose (spoil) your registration or migration card, you must apply to Room 11 of the Dean’s Office immediately.

Foreign students who have arrived in RF by visas are allowed to stay in RF for the period determined by the validity of their visa. A foreign student must leave the Russian Federation before their visa is expired if they either do not receive a new visa or do not extend the current visa or do not get permission for temporary stay. According to Article 25.10 of the Federal Law “On the Procedure for Exiting and Entering the Russian Federation” of August 15, 1996 No. 114-ФЗ foreign citizens who have arrived in RF with violation of the order of crossing the State Border, who have not registered in time, who have not left RF after the permitted period of their stay in Russia has been expired, who have worked illegally, as well as those who have provided inaccurate or false data about themselves while being registered are considered to stay illegally on the territory of RF and bear responsibility in accordance with RF legislation. Responsibility of such foreign citizens and stateless people is determined by the Code of Administrative Offences of RF and includes fines in the amount from two to five thousand rubles for foreign citizens with or without administrative expulsion from the territory of RF.
Required documents

In order to apply for studying at the Academy an applicant should go through the following admission procedure:

1. To send a scanned version of completed application, copy of national passport with attached copies of the original educational documents by: office@ma-cfu.ru

2. If an applicant is accepted by academy, the procedure of making invitation for obtaining student visa at the local Russian Embassy is launched (it usually takes a month).

3. As soon as the invitation is ready, academy will send it to an applicant or his/her representative.

Medical Academy Named After S.I. Georgievsky
Hostel Facility

In Hotel No. 4 there is an electronic reading hall where students may visit the University site and get an approach to all the teaching and methodical manuals necessary to prepare for classes and exams. Both the territory of the University and the main students’ routes from the hostels to the educational buildings are protected and patrolled by officers of guard service. The hostels fees at CSMU are from 250 to 510 USD per year depending on the conditions and the level of conveniences provided.

Most foreign students trained at Crimean State Medical University named after S. I. Georgievsky stay in comfortable hostels in the campus. The campus is built on the bank of the River Salgir in a five minutes’ walk from the educational buildings. On the opposite bank of the Salgir there is Gagarin park, the largest and most beautiful park in Simferopol, a favorite place of rest for the citizens and guests of our town.

Students who have just arrived are settled in Hostel No.2 on the territory of the University itself. Here during the first year of studies the students are adapted to life in Ukraine. On the ground floor of the same building there are classrooms of the preparatory faculty. The rooms in this hostel are for three or four persons. There is a shower room, two kitchens, a classroom on every floor. There are also several students’ canteens and cafes on the territory of the University.

Rooms in other hostels of the campus are intended for two or three persons. These hostels are of apartment type. Every apartment is for 3-5 persons and has a shower room and a lavatory. On the territory of the campus there are food shops, 10 cafes of national Indian, Malaysian, Chinese and Arabic cuisine, several Internet-cafes, public telephones, a laundry, a sports ground and a special place for barbecue cooking. There is also a taxi park near the campus.
